

Profile

As an **Industrial Designer** with a foundation in **Control & Automation Engineering**, I have always worked at the intersections between **creative and technical** disciplines. Focusing on **3D models** and **coding** around them, most of my professional contributions fit the definition of a **Technical Artist**.

Beyond **manual authoring**, I have designed dozens of **automated workflows** that have **scaled the production and management** of hundreds of thousands of **3D assets** for applications in various fields, including **medical, manufacturing, and product visualization** for the **Web and XR**.

Skills

- **3D MODELING & TEXTURING** Creating assets for **offline rendering, real-time visualization** (Web, XR, Game Engines), and **digital manufacturing** (CNC and 3D printing) based on concept art, photo references and technical drawings.
Blender | Substance Painter | Substance Sampler | GIMP | Inkscape
- **TECHNICAL ART** Developing **standalone scripts** and **API-integrated plugins** (e.g. for Blender, Substance Painter, GIMP) to **standardize and automate** pipelines for the **authoring, processing and management** of **3D assets**.
Blender API | Substance Painter API | GIMP API | Python | Web (HTML/CSS/JS) | Command Line Interfaces (CLI)
- **SYSTEMS INTEGRATION** Designing **middleware** to connect **Enterprise Tools** (Odoo, Redmine), **Web Services** (Google Cloud, AWS, Discord), **3D Suites** (Blender, Substance), and **Game Engines** (Unity, Unreal).
Python | Javascript | C/C++ | C# | Command Line Interfaces (CLI)
- **XR DEVELOPMENT** Creating **XR apps** for the **Meta Quest** and **Pico** headsets (VR/MR) with integrations to **cloud-based web services** (Google Cloud/Firebase) for **database and 3D asset repositories**.
Unity | Unreal Engine | Meta Quest SDK | Pico SDK | Javascript | C/C++ | C#
- **PRODUCT DESIGN** Engineering and **designing physical products** at different stages of the development cycle, from **prototyping** to **mass production**, utilizing specialized **CAD software**.
Autodesk Fusion | Autodesk Inventor | PTC Onshape
- **INDUSTRIAL AUTOMATION** Automating **digital manufacturing pipelines** (CNC and 3D printing), including tools for **bulk order placement, mesh processing, production nesting, and logistics**.
Python | C/C++ | Command Line Interfaces (CLI) | G-Code | C#

Experience

- **3D Artist / Project Manager / Technical Lead**

SPASE INC. - San Jose, California, United States (Remote)

Full-time - Jun 2019 - Dec 2025 (6 years and 7 months)

- **Authoring photorealistic 3D assets** based on reference photos and technical drawings for **real-time product visualization** in **e-commerce platforms** and **interior design applications**.
- **Scoping and quoting projects** for new and recurring clients, **directing and briefing a team of diverse artists**, performing final **quality control** and **technical adjustments** on 3D assets.
- **Creating internal tools** to **standardize** and **optimize** production **pipelines** (e.g. plugins for Blender, Substance Painter, Chrome, GIMP).
- **Developing middleware** to **connect** back-end infrastructure (**Google Sheets, Firebase, AWS**), team tools (**Discord**) and 3D authoring software (**Blender, Substance Painter**).

- **Production Consultant**

СМОЛЕНСК МЕБЕЛЬ - Smolensk, Smolensk, Russia (On-Site)

Full-time Freelance - Sep 2018 - Dec 2018 (4 months)

- **Deploying an ERP** at a Smolensk Mebel large-scale furniture factory, **integrating custom systems** such as CCTV, factory access control, inventory management tools and CNC machines.
- **Updating technical drawings** and performing the migration of historical manufacturing data from different sources into a centralized and modern **production management system**.
- **Developing real-time scheduling algorithms** to synchronize production cycles with **live data** from sales, inventory, and logistics.

- **3D Artist / Software Developer**

DENTAL DIRECT BRASIL - São Paulo, São Paulo, Brazil (On-Site / Remote)

Full-time - Apr 2016 - Sep 2018 (2 years and 4 months)

- **Integrating systems** for the **secure acquisition, storage, and management** of confidential patient information and **3D medical imaging (CT/3D scans)**.
- **Automating 3D medical images manipulation** via custom algorithms for **volumetric analysis, parametric mesh generation** and **mesh pre-processing** for additive manufacturing.
- **Designing automated scheduling and runtime systems** for Drop-on-Powder 3D printers, optimizing throughput based on **real-time logistics, delivery urgency, and nesting efficiency**.

- **Intern Mechanical Engineer**

SHEMPO - Campinas, São Paulo, Brazil (On-Site)

Part-time - Mar 2011 - May 2011 (3-month internship)

- **Creating technical drawings** in **CAD software** for parts used in LED-panel signages and large digital clocks (for skyscraper rooftops), following the constraints of different **production methods** (e.g. injection, casting, sheetmetal, machining).

Education

- **Centro Universitário Belas Artes de São Paulo (FEBASP)**

Product Design (Industrial Design)

Graduated

2014 - 2017

- **Universidade Estadual de Campinas (UNICAMP)**

Control & Automation Engineering (Mechatronics)

Incomplete

2009 - 2013

Fabio Orsi

3D Tech Artist & Developer
